HOMEWORK SOLUTIONS

Whether your child is new to homework or has been doing it for years, your support can help her do her best. That's important, because homework reinforces what she's learning in school. Here's how to set her up for success.

Find a Good Schedule

Set aside a specific time for homework so it becomes a habit, perhaps right before or after dinner. Also, suggest that she figure out a plan that works best for her. She could start with the easiest assignment to gain momentum or get the hardest one out of the way first.

Eliminate Distractions

Make sure your child turns off electronics before she starts homework. Also, you might encourage everyone in the house to have "quiet time" while she does her assignments. Maybe you'll read or pay bills while younger siblings color, for instance.

Troubleshoot Problems

When your youngster gets stuck, offer to help – but avoid telling her the answers. If she's confused by the directions, try reading them together. Or if she's struggling with an addition problem, offer to walk her through a few sample problems in the back of her math book.

DON'T FORGET...
